

Bydgoszcz, 21th October, 2014

Professor Ivan Minčík
President of Slovak Society of Urology

Dear Professor Minčík,

On your hands I am sending this invitation letter to the Board and all Members of Slovak Society of Urology.

Since 2009 Polish Urological Association has been publishing English-language Central European Journal of Urology. Initially a scientific journal for Polish urologists, it has gradually changed to an international magazine. Substantial changes in management introduced in 2013 resulted in Pubmed/Medline indexation early this year.

Our present goals are to become a real platform for Central European urologists and to obtain Impact Factor. That is why I am inviting all Slovak urologists to read, cite and write for Central European Journal of Urology. Me personally, and the Board of Polish Urological Association wish CEJU to be also your Journal. We encourage you to submit to CEJU original and review papers. After fast and efficient review process papers become quickly available for everybody and are accessible through Pubmed and Pubmed Central. For authors we can offer free language edition service and statistical advice. For active collaborators we have a place in Editorial Board. All countries contributing to the Journal substantially have or will have their representative among Section Editors.

However, the Journal needs local promotion to be recognized and to attract more interesting publications. It also urgently needs citations. That is why I am asking your help in reaching Slovak urologists.

I hope for your cooperation in promoting CEJU and close cooperation for the sake of this Journal and urologists from Central Europe.

Kind regards,
Tomasz Drewa

Editor-in-Chief
Central European Journal of Urology
